## **DETAILED ACTION**

### ***Status of Application***

1. Acknowledgement is made of amendment filed 3/26/04. Upon entering the amendment, the claims 1-12, 16-19 and 39-57 are canceled and the claims 13 and 15 are amended. Claims 20-38 are previously canceled. New claims 58-60 are added.
2. The claims 13-15 and 58-60 are pending and presented for the examination.

### ***Response to Arguments***

3. Applicant's arguments filed 3/26/04 have been fully considered but they are not persuasive. However, the scope changes made into the currently amended claims, the new ground(s) of rejection is necessitated and issued as following below.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 13-15 and 58-60 are rejected under 35 U.S.C. 102(e) as being anticipated by Morgan (US6274579, 6391875, 2003/0064988); Partridge(2003/0083330) or Ascher et al(US2003/0032643).

Note: all these patents are children cases of US6274579 and disclosures therein are substantially same. Therefore, the examiner will use US'579 to represent all these cases.

Morgan et al(US'579) teaches a compound (+)-(2S, 3S)-2-(3-chlorophenyl)-3,5,5-trimethyl-2-morpholinol and its composition used for treating attention deficit hyperactivity disorder(ADHD), obesity or addiction to nicotine containing product(e.g. tobacco), see abstract. The limitations required by the claim 1(e.g. weight gain, attention deficit disorder(ADD), seasonal affective disorder) are taught in the cited reference, for example, obesity is corresponding to weight gain, ADHD (a specie) to ADD and depression to seasonal affected disorder(see especially, US '643 patent, col. 2, paragraph 20).

As to calim 14, optically pure metabolite is well taught at col. 2, lines 15-35

As to claim 60, nicotine addiction is also taught in abstract.

The critical elements required by the claims are well taught by the cited reference(s) and thus the claims are not patentably distinct over the prior art of the record and all the claims are properly included in this rejection as being anticipated.

### ***Conclusion***

6. No claim is allowed.
7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1618

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
